Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) Cleo Borac, Silviu Borac

The second edition of this book is out! Please look for the second edition (updated and improved)! This is the first edition. The second edition is also less expensive as the older edition is being phased out.

About “Competitive Mathematics for Gifted Students” This series provides practice materials and short theory reminders for students who aim to excel at problem solving. Material is introduced in a structured manner: each new concept is followed by a problem set that explores the content in detail. Each book ends with a problem set that reviews both concepts presented in the current volume and related topics from previous volumes. The series forms a learning continuum that explores strategies specific to competitive mathematics in depth and breadth. Full solutions explain both reasoning and execution. Often, several solutions are contrasted. The problem selection emphasizes comprehension, critical thinking, observation, and avoiding repetitive and mechanical procedures. Ready to participate in a math competition such as MOEMS, Math Kangaroo in USA, or Noetic Math? This series will open the doors to consistent performance.

About Level 2 This level of the series is designed for students who know the multiplication tables, integer division with remainder and basic operations with decimals. Our level 1 books explain concepts that may need review before attempting level 2. Level 2 books are suitable for preparing Math Kangaroo 3-4 and MOEMS-E. Many of the concepts presented, however, reach much farther into the AMC-8 level. Level 2 consists of: Word Problems (volume 5), Operations (volume 6), Arithmetic (volume 7), and Combinatorics (volume 8).

About Volume 5 - Word Problems The problems train comprehension and critical reading skills. Algebraic methods should not be used when helping students solve these problems. We recommend building concrete models that show the relations among the various quantities. This volume explains how to build concrete models for comparison, the method of reduction to unity, handling problems based on multiples and remainders. A review of problems based on time, rates, and coins concludes the presentation of word problems. Problems avoid the repetition of the same context, thus providing a challenging solving experience.

From reader reviews:

Robert Crumrine:

In this 21st millennium, people become competitive in each and every way. By being competitive currently, people have to do something to make them survive, being in the middle of the crowded place and notice by surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yep, by reading a guide your ability to survive boost then having chance to remain than other is high. For you personally who want to start reading a book, we give you this particular Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) book as starter and daily reading e-book. Why, because this book is more than just a book.

Katy Pinkham:

The feeling that you get from Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) is the more deep you rooting the information that hide inside words the more you get considering reading it. It does not mean that this book is hard to comprehend but Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) giving you buzz feeling of reading. The article author conveys their point in certain way that can be understood by simply anyone who read the idea because the author of this guide is well-known enough. That book also makes your vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We recommend you for having this particular Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) instantly.

Thomas Stewart:

Information is provisions for folks to get better life, information presently can get by anyone on everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is inside former life are hard to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you have the unstable resource then you understand it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) as the daily resource information.

Jody Vinson:

In this era globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended for you is Practice Word Problems: Level 2 (ages 9 to 11) (Competitive Mathematics for Gifted Students) (Volume 5) this reserve consist a lot of the information from the condition of this world now. That book was represented

so why is the world has grown up. The language styles that writer value to explain it is easy to understand. Often the writer made some study when he makes this book. Here is why this book appropriate all of you.
