Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing)

Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing)

The aquatic coastal zone is one of the most challenging targets for environmental remote sensing. Properties such as bottom reflectance, spectrally diverse suspended sediments and phytoplankton communities, diverse benthic communities, and transient events that affect surface reflectance (coastal blooms, runoff, etc.) all combine to produce an optical complexity not seen in terrestrial or open ocean systems. Despite this complexity, remote sensing is proving to be an invaluable tool for "Case 2" waters. This book presents recent advances in coastal remote sensing with an emphasis on applied science and management. Case studies of the operational use of remote sensing in ecosystem studies, monitoring, and interfacing remote sensing/science/management are presented. Spectral signatures of phytoplankton and suspended sediments are discussed in detail with accompanying discussion of why blue water (Case 1) algorithms cannot be applied to Case 2 waters.

Audience

This book is targeted for scientists and managers interested in using remote sensing in the study or management of aquatic coastal environments. With only limited discussion of optics and theory presented in the book, such researchers might benefit from the detailed presentations of aquatic spectral signatures, and to operational management issues. While not specifically written for remote sensing scientists, it will prove to be a useful reference for this community for the current status of aquatic coastal remote sensing.

From reader reviews:

Richard Capps:

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a go walking, shopping, or went to the Mall. How about open or read a book eligible Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing)? Maybe it is to be best activity for you. You know beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with the opinion or you have other opinion?

Kenneth Clark:

Book is definitely written, printed, or descriptive for everything. You can recognize everything you want by a guide. Book has a different type. As it is known to us that book is important matter to bring us around the world. Alongside that you can your reading proficiency was fluently. A reserve Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing) will make you to always be smarter. You can feel much more confidence if you can know about almost everything. But some of you think in which open or reading a book make you bored. It isn't make you fun. Why they could be thought like that? Have you trying to find best book or suited book with you?

Minnie Weiner:

Nowadays reading books be a little more than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want get more knowledge just go with knowledge books but if you want experience happy read one with theme for entertaining such as comic or novel. The particular Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing) is kind of reserve which is giving the reader unpredictable experience.

Cory Thomas:

The reason why? Because this Remote Sensing of Aquatic Coastal Ecosystem Processes: Science and Management Applications (Remote Sensing and Digital Image Processing) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book next to it was fantastic author who also write the book in such incredible way makes the content on the inside easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This unique book will give you a lot of benefits than the other book possess such as help improving your proficiency and your critical thinking technique. So , still want to postpone having that book? If I ended up you I will go to the e-book

store hurriedly.
