Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence)

Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence)

Information and communication technology, in particular artificial intelligence, can be used to support economy and commerce using digital means. This book is about agents and multi-agent distributed systems applied to digital economy and e-commerce to meet, improve, and overcome challenges in the digital economy and e-commerce sphere. Agent and multi-agent solutions are applied in implementing real-life, exciting developments associated with the need to eliminate problems of distributed systems.

The book presents solutions for both technology and applications, illustrating the possible uses of agents in the enterprise domain, covering design and analytic methods, needed to provide a solid foundation required for practical systems. More specifically, the book provides solutions for the digital economy, e-sourcing clusters in network economy, and knowledge exchange between agents applicable to online trading agents, and security solutions to both digital economy and e-commerce. Furthermore, it offers solutions for e-commerce, such as, mapping and alignment of ontologies for business, negotiation, automated auctions, recommender systems to support traders in business activities, and game simulations.

From reader reviews:

Cynthia Hughes:

This book entitled Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) to be one of several books that will best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this kind of book in the book retail outlet or you can order it by means of online. The publisher with this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

Kevin Strickland:

The particular book Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) will bring you to the new experience of reading a book. The author style to spell out the idea is very unique. In the event you try to find new book to see, this book very suitable to you. The book Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) is much recommended to you to read. You can also get the e-book through the official web site, so you can quickly to read the book.

Mable Watkins:

The book entitled Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) contain a lot of information on it. The writer explains the girl idea with easy approach. The language is very easy to understand all the people, so do not really worry, you can easy to read it. The book was written by famous author. The author brings you in the new period of literary works. You can easily read this book because you can keep reading your smart phone, or device, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open up their official web-site and also order it. Have a nice learn.

Johnny Sutton:

A lot of reserve has printed but it is different. You can get it by net on social media. You can choose the most effective book for you, science, comedy, novel, or whatever by means of searching from it. It is called of book Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence). You can add your knowledge by it. Without departing the printed book, it might add your knowledge and make anyone happier to read. It is most crucial that, you must aware about book. It can bring you from one destination to other place.
