This book provides cardiologists with access to the wealth of imaging from the Royal Brompton Hospital and National Heart and Lung Institute in London to enable them to improve on their own skills and refine their imaging technique. The authors correlate this echocardiography experience with the pathological and surgical aspects of congenital heart defects. They include a review of the pathologic, physiologic and surgical observations of different congenital diseases to assist in understanding the various echocardiographic presentations. The book contains large numbers of echocardiographic images.
