Practice Guidelines for the Treatment of Patients with Schizophrenia American Psychiatric Association, APA

Developed by experts on schizophrenia and reviewed by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients with Schizophrenia" provides therapists with a set of patient care strategies that should aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline should also help managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.
