Global Surgery and Public Health: A New Paradigm Catherine R. deVries, Raymond R. Price

Until recently, surgical services in developing countries have been neglected, despite the critical role they could play in preventing disease and saving lives. Over the last few years, world leaders, public health professionals, and surgeons have collaborated to discuss public policies, resource utilization, healthcare reform, surgical safety, and workforce issues in order to bring these life-saving services to those most in need. *Global Surgery and Public Health: A New Paradigm* offers the most current information as well as a systematic approach to considering surgery in the context of a broader umbrella of public health. It is ideal for courses in Global/International Health, Public Health, Surgery, Medical Anthropology as well as for professionals in public policy and international health care and humanitarian groups serving the surgical needs of patients in under-resourced settings.
