MATLAB for Neuroscientists serves as the only complete study manual and teaching resource for MATLAB, the globally accepted standard for scientific computing, in the neurosciences and psychology. This unique introduction can be used to learn the entire empirical and experimental process (including stimulus generation, experimental control, data collection, data analysis, modeling, and more), and the 2nd Edition continues to ensure that a wide variety of computational problems can be addressed in a single programming environment.

This updated edition features additional material on the creation of visual stimuli, advanced psychophysics, analysis of LFP data, choice probabilities, synchrony, and advanced spectral analysis. Users at a variety of levels—advanced undergraduates, beginning graduate students, and researchers looking to modernize their skills—will learn to design and implement their own analytical tools, and gain the fluency required to meet the computational needs of neuroscience practitioners.

- The first complete volume on MATLAB focusing on neuroscience and psychology applications
- Problem-based approach with many examples from neuroscience and cognitive psychology using real data
- Illustrated in full color throughout
- Careful tutorial approach, by authors who are award-winning educators with strong teaching experience

From reader reviews:

Evelyn Blow:

The publication untitled MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB is the e-book that recommended to you to study. You can see the quality of the guide content that will be shown to you actually. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of analysis when write the book, to ensure the information that they share to you is absolutely accurate. You also will get the e-book of MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB from the publisher to make you a lot more enjoy free time.

Larry Hudgens:

The guide with title MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB has lot of information that you can discover it. You can get a lot of advantage after read this book. This particular book exist new knowledge the information that exist in this e-book represented the condition of the world right now. That is important to you to find out how the improvement of the world. That book will bring you throughout new era of the internationalization. Do you like reading a guide? Confuse to looking for your favorite book? Or your book had been rare? Why so many problem for the book? But any kind of people feel that they enjoy to get reading. Some people likes reading, not only science book but novel and MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB or others sources were given knowledge for you. After you know how the great a book, you feel want to read more and more. Science reserve was created for teacher or students especially. Those ebooks are helping them to increase their knowledge. In different case, beside science e-book, any other book likes MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB to make your spare time considerably more colorful. Many types of book like this one.

Donald Noble:

A lot of publication has printed but it is different. You can get it by internet on social media. You can choose the best book for you, science, witty, novel, or whatever simply by searching from it. It is referred to as of book MATLAB for Neuroscientists, Second Edition: An Introduction to Scientific Computing in MATLAB. Contain your knowledge by it. Without departing the printed book, it can add your knowledge and make you actually happier to read. It is most crucial that, you must aware about publication. It can bring you from one place to other place.
