HIV and AIDS in Africa: Beyond Epidemiology

HIV and AIDS in Africa: Beyond Epidemiology

HIV and AIDS in Africa: Beyond Epidemiology is a collection that seeks to further our understanding of AIDS by shifting the predominant understandings generated by biomedical and epidemiological research.

- Brings together international contributors---including often overlooked African scholars and activists---from across the social sciences to examine HIV and AIDS from angles previously unexplored.
- By presenting on-the-ground evidence and ethnographic cases, emphasizes that HIV transmission in sub-Saharan Africa is a complex and regionally specific phenomenon rooted in local economies, deepening poverty, migration, gender, war, global economies, and cultural politics.
- Recognizes that AIDS in Africa cannot be stemmed until social, gender, and economic inequities are addressed in meaningful ways.
