Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics)

Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics)

Social epidemiology is the study of how social interactions—social norms, laws, institutions, conventions, social conditions and behavior—affect the health of populations. This practical, comprehensive introduction to methods in social epidemiology is written by experts in the field. It is perfectly timed for the growth in interest among those in public health, community health, preventive medicine, sociology, political science, social work, and other areas of social research.

Topics covered are:

- Introduction: Advancing Methods in Social Epidemiology
- The History of Methods of Social Epidemiology to 1965
- Indicators of Socioeconomic Position
- Measuring and Analyzing 'Race'
- Racism and Racial Discrimination
- Measuring Poverty
- Measuring Health Inequalities
- A Conceptual Framework for Measuring Segregation and its Association with Population Outcomes
- Measures of Residential Community Contexts
- Using Census Data to Approximate Neighborhood Effects
- Community-based Participatory Research: Rationale and Relevance for Social Epidemiology
- Network Methods in Social Epidemiology
- Identifying Social Interactions: A Review, Multilevel Studies
- Experimental Social Epidemiology: Controlled Community Trials
- Propensity Score Matching Methods for Social Epidemiology
- Natural Experiments and Instrumental Variable Analyses in Social Epidemiology
- and Using Causal Diagrams to Understand Common Problems in Social Epidemiology.

"Publication of this highly informative textbook clearly reflects the coming of age of many social epidemiology methods, the importance of which rests on their potential contribution to significantly improving the effectiveness of the population-based approach to prevention. This book should be of great interest not only to more advanced epidemiology students but also to epidemiologists in general, particularly those concerned with health policy and the translation of epidemiologic findings into public health practice. The cause of achieving a 'more complete' epidemiology envisaged by the editors has been significantly advanced by this excellent textbook."

—**Moyses Szklo**, professor of epidemiology and editor-in-chief, *American Journal of Epidemiology*, Johns Hopkins University

"Social epidemiology is a comparatively new field of inquiry that seeks to describe and explain the social and geographic distribution of health and of the determinants of health. This book considers the major methodological challenges facing this important field. Its chapters, written by experts in a variety of disciplines, are most often authoritative, typically provocative, and often debatable, but always worth reading."

—**Stephen W. Raudenbush**, Lewis-Sebring Distinguished Service Professor, Department of Sociology, University of Chicago

"The roadmap for a new generation of social epidemiologists. The publication of this treatise is a significant event in the history of the discipline."

—**Ichiro Kawachi**, professor of social epidemiology, Department of Society, Human Development, and Health, Harvard University

"*Methods in Social Epidemiology* not only illuminates the difficult questions that future generations of social epidemiologists must ask, it also identifies the paths they must boldly travel in the pursuit of answers, if this exciting interdisciplinary science is to realize its full potential. This beautifully edited volume appears at just the right moment to exert a profound influence on the field."

—**Sherman A. James**, Susan B. King Professor of Public Policy Studies, professor of Community and Family Medicine, professor of African-American Studies, Duke University

From reader reviews:

Lisa Gaither:

The ability that you get from Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) will be the more deep you digging the information that hide inside the words the more you get enthusiastic about reading it. It does not mean that this book is hard to know but Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) giving you thrill feeling of reading. The article writer conveys their point in particular way that can be understood by simply anyone who read it because the author of this book is well-known enough. That book also makes your current vocabulary increase well. It is therefore easy to understand then can go along, both in printed or e-book style are available. We propose you for having this particular Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) instantly.

Kevin Ostby:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their spare time with their family, or all their friends. Usually they performing activity like watching television, going to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? May be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to try look for book, may be the publication untitled Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) can be fine book to read. May be it may be best activity to you.

Ruby Mejia:

Beside this specific Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) in your phone, it could possibly give you a way to get more close to the new knowledge or info. The information and the knowledge you will got here is fresh through the oven so don't be worry if you feel like an older people live in narrow community. It is good thing to have Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) because this book offers for your requirements readable information. Do you occasionally have book but you do not get what it's exactly about. Oh come on, that won't happen if you have this within your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss that? Find this book and also read it from right now!

Neil Dussault:

As a college student exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know

that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Methods in Social Epidemiology (Public Health/Epidemiology and Biostatistics) can make you truly feel more interested to read.
