The natural world is a dynamic place and our understanding of it is forever growing and changing. Since *Animal* was first published in 2001, the African elephant has been reclassified into two species, a cat-sized rat has been discovered in Papua New Guinea, the only plant-eating spider has been found in Central America, a bird-eating fanged frog has been located in Vietnam, and more than 1,250 new species of amphibians have been identified.

Fully revised and updated to take into account the latest scientific discoveries and developments, more than fifty new species, and changes to the distribution, population numbers, and conservation status of many animal groups, *Animal* brings together the expertise of natural history specialists and outstanding wildlife photographers to illustrate, describe, and explain the incredible range of creatures in the animal kingdom.
