Netsilik Eskimo Asen Balikci

Today regarded as a classic, this description of life in polar cultures reflects traditional ethnography at its best and has been a favored account for thirty years. Balikci's important study of the Netsilingmiut, an isolated tribe of Arctic hunters living close to the Arctic Circle, examines their technology, social organization, and religion. The extended period of time that the author worked with the Netsilik Eskimo is reflected in the depth of his understanding of their past and present environments. His portrayal of their dependence on government services, along with modern technology, provides an accurate and necessary insight into the process of cultural change being experienced by cultures in many developing countries. The volume makes a superb accompaniment to the Netsilik documentary film series.
