**Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing** Ronald Quan

**Discover the inner-workings of electronics through innovative hands-on experiments**

Are you fascinated by the power of even the smallest electronic device? *Electronics from the Ground Up* guides you through step-by-step experiments that reveal how electronic circuits function so you can advance your skills and design custom circuits. You'll work with a range of circuits and signals related to optical emitters and receivers, audio, oscillators, and video.

This practical resource explains components, construction techniques, basic test equipment, circuit analysis, and troubleshooting. Photographs, schematics, equations, and graphs are included throughout. By the end of the book, you'll be able to hack and modify existing circuits to create your own unique designs.

Do-it-yourself experiments cover:

- Batteries, lamps, and flashlights
- Light emitters and receivers
- Diodes, rectifiers, and associated circuits
- Transistors, FETs, and vacuum tubes
- Amplifiers and feedback
- Audio signals and circuits
- Oscillators
- AM and FM signals and circuits
- Video basics, including video signals
- Video circuits and systems

“Excellent... Nothing can replace hands-on experience and Quan immerses the hobbyist/designer right into the fray up to their elbows.”—EDN Magazine

### **From reader reviews:**

#### **Brian Price:**

What do you think of book? It is just for students because they are still students or that for all people in the world, what best subject for that? Only you can be answered for that issue above. Every person has different personality and hobby for each and every other. Don't to be pushed someone or something that they don't want do that. You must know how great as well as important the book Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing. All type of book is it possible to see on many options. You can look for the internet solutions or other social media.

#### **William Boehme:**

Book is to be different for each and every grade. Book for children until eventually adult are different content. As it is known to us that book is very important usually. The book Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing seemed to be making you to know about other expertise and of course you can take more information. It is quite advantages for you. The publication Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing is not only giving you more new information but also to get your friend when you experience bored. You can spend your own personal spend time to read your publication. Try to make relationship with the book Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing. You never truly feel lose out for everything in case you read some books.

#### **Sean Scruggs:**

Reading a reserve can be one of a lot of task that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new info. When you read a reserve you will get new information mainly because book is one of various ways to share the information or perhaps their idea. Second, reading through a book will make anyone more imaginative. When you examining a book especially fictional book the author will bring that you imagine the story how the figures do it anything. Third, you are able to share your knowledge to other people. When you read this Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing, you may tells your family, friends and also soon about yours publication. Your knowledge can inspire the mediocre, make them reading a guide.

#### **Frederica Dawkins:**

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you will get it in e-book method, more simple and reachable. This Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing can give you a lot of good friends because by you checking out this one book you have matter that they don't and make an individual more like an interesting person. This particular book can be one of a step for you to get success. This guide offer you information that possibly your friend doesn't

realize, by knowing more than some other make you to be great individuals. So , why hesitate? We should have Electronics from the Ground Up: Learn by Hacking, Designing, and Inventing.
