Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology)

Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology)

Contemporary man-machine interfaces are increasingly characterized by multimodality, nonintrusiveness, context-sensitivity, adaptivity, and teleoperability. The implementation of such properties relies on novel techniques in fields such as, e.g., computer vision, speech technology, trainable classifiers, robotics, and virtual reality.

This book puts special emphasis on technological aspects of advanced interface implementation. Furthermore it focuses on interface design and usability.

For readers with a background in engineering and computer science, most chapters offer design guidelines and case studies, as well as a description of the functioning and limitations of the algorithms required for implementation. In addition, complementary code examples in C++ are given where appropriate.

As a special feature the book is accompanied by two easy-to-handle software development environments, which offer access to extensive public domain software for computer vision, classification, and virtual reality. These environments also provide real-time access to peripheral components like, e.g., webcams or microphones, enabling hands-on experimentation and testing.

From reader reviews:

Betty Sanchez:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with schooling books but if you want sense happy read one with theme for entertaining for example comic or novel. The particular Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology) is kind of book which is giving the reader unforeseen experience.

Francis Mason:

Reading a guide can be one of a lot of activity that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new facts. When you read a guide you will get new information due to the fact book is one of various ways to share the information as well as their idea. Second, looking at a book will make anyone more imaginative. When you looking at a book especially tale fantasy book the author will bring you to definitely imagine the story how the personas do it anything. Third, you are able to share your knowledge to other individuals. When you read this Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology), it is possible to tells your family, friends and also soon about yours publication. Your knowledge can inspire different ones, make them reading a book.

Bryan Jones:

People live in this new day time of lifestyle always try to and must have the extra time or they will get large amount of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely without a doubt. People is human not really a robot. Then we ask again, what kind of activity have you got when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative in spending your spare time, typically the book you have read is actually Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology).

Dean Herbert:

Within this era which is the greater man or woman or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time not much but quite enough to get a look at some books. One of many books in the top record in your reading list will be Advanced Man-Machine Interaction: Fundamentals and Implementation (Signals and Communication Technology). This book and that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upwards and review this reserve you can get

many advantages.
