## Critical Perspectives on Language Education: Australia and the Asia Pacific (Multilingual Education)

The studies in this volume investigate how multilingual education involves a critical engagement with questions of identity and culture, and a movement towards new ways of being and belonging. It addresses previously under-explored issues, in particular the integration of theories like 'thirdness', and practices of language education and maintenance with relevance to the Asia-Pacific region. The analyses reveal the delicate balance of interests of all stakeholders and offer detailed insights into the reality of multilingual education, with specific examples of Chinese, English, Japanese and Tamil. In a globalised world, effective language education has become increasingly important, and the studies presented here have the potential to inform and advance evidence-based multilingual education through adding important dimensions of theoretical exploration and refreshing empirical resources.
